Aevo Consulting Group

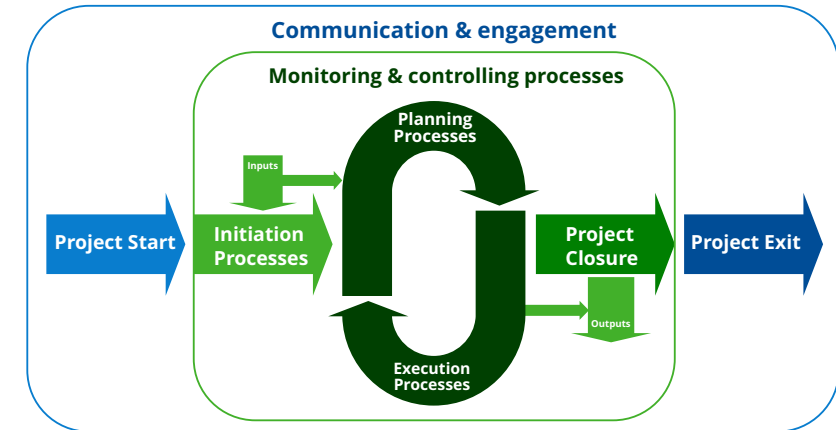

At Aevo Consulting Group, we believe in excellence and this value underpins all that we do. Our core focus is providing specialist financial-modelling services. We've helped JSE listed companies, parastatals and local & national government departments make informed decisions with flexible and robust tools.

With a multi-disciplinary advisory team in place, a long history of successful projects and close links to a range of strategic network partners, our offerings are diversifying more widely into the management consulting arena. Whatever we do, we aim to deliver professional, results-driven advisory and consulting services that respond to client needs.

Taking a holistic approach, we also offer a range of complimentary services, from business analytics, modelling and reporting, change leadership, human resources, dispute resolution, financial oversight and accounting, project administration to engineering and technical services and support.

Project Management Services

Aevo Consulting Group (Pty) Ltd has a range of project management resources available to provide specialist project management services. Following tried-and-tested methodologies aligned to the Project Management Body of Knowledge but with enough experience to adapt to real-world complexity; each project is considered different and handled as such. Our general approach considers the full life-cycle of any project or programme, is collaborative and consultative, focusing on a clear understanding of the scope, clarifying expectations upfront and proceeding with the effective management processes and performance management.

Project Management Experience

Our team has experience in both the private and public sectors and in projects in housing, water, energy, telecoms and office relocations. Within the Information Technology and telecoms sector we have successfully completed the following:

Establishing and managing the PMU for the following Johannesburg Broadband Network:

- Detailed feasibility study of the JBN
- JBN Re-Launch
- Relocation of entire operation
- Setup of Municipal-owned Entity
- Learnerships, Hackathon & JEDI initiatives
- BRT Wifi roll-out
- Development of strategy & implementation plan for owning and operating the asset.
- Assisting with cancellation of the BOT agreement, & transfer of the asset into a new Municipal Owned Entity (MoE).
- Assisting in a strategic role in setting-up and interim management of the MoE, including secondment of the interim Acting CFO

Fibre OSP, ISP design, build and implementation, WIFI design, build and implementation, Managed services support and infrastructure

Completed over 1500 access and route builds

- Over 200km of fibre infrastructure across the 1500 sites over 3 years for multiple clients
